SFCC Hosts National Advanced Technology Conference

Santa Fe, NM, May 25, 2010 — Santa Fe Community College hosts the [National Coalition of Advanced Technology Centers](#) 2010 Summer Workshop, “Building Green,” held from June 2 to 4. The conference will focus on new SFCC programs in environmental technologies, such as biofuels, solar energy, water conservation and green building – all programs that will be housed in the college’s new Trades and Advanced Technology Center currently under construction at the college.

The National Coalition of Advanced Technology Centers has more than 170 member institutions ranging from colleges, universities and schools to the corporate community. The organization represents a network of higher education resources that advocates and promotes the use of technology applications to enhance economic and workforce development programs and services.

The conference at SFCC will feature a day of workshops and presentations highlighting green and sustainable directions in career and technical education, the LEED/green design of the new Trades and Advanced Technology building, as well as tours to Los Alamos National Lab and Santa Fe’s [Emerald Home](#).

About Santa Fe Community College

For more than 27 years, Santa Fe Community College has been the gateway to success for individuals and the community by providing affordable, high quality educational programs that serve the social, cultural, technological and economic needs of a diverse community. The college serves more than 14,500 students per year in its credit, noncredit and adult basic education programs. For further information, visit www.sfccnm.edu or call (505) 428-1000.
