

# What can I do with a major in...?

## Environmental Technologies

Associate in Applied Science  
School of Business and Applied Technologies

This degree provides students with an in-depth understanding of issues regarding: sustainability, renewable energy and water conservation. Through their chosen concentration, students will acquire skills needed to seek entry level positions in a wide range of energy and water related businesses, and public agencies, or they may consider starting their own business.

*Completion of this degree could lead to employment in industries such as:*

- Energy Management
- Geothermal
- Green Building
- Solar Energy
- Transportation/BioFuels
- Wind Energy

*In positions such as:*

- Installers
- Policy Advocates
- Sales
- Systems Operations and Maintenance
- Systems Designers
- Technicians

# What skills will I gain from...?

## Environmental Technologies

- Whole systems thinking
- Site analysis
- Systems design
- Instrumentation and controls
- Equipment resourcing
- Resource management
- Load and demand analysis
- Energy analysis and assessment
