

# Creating Sustainable Learning Environments

Creating universally designed, sustainable classroom environments gives educators the flexibility to concentrate on each student's learning style while respecting the integrity of the curricula. It also increases the lifespan of the course material allowing it to be used in more ways and for more learners.

**FREE workshop sessions presented by Aaron Baker**

**Lecture Demo: 4 to 6 p.m., Monday, Oct. 27**  
**Jemez Room 1**

**Hands On: noon to 2 p.m., Tuesday, Oct. 28**  
**Room LL 313 J**

## **PRESENTATION WILL GIVE YOU**

- **An overview of what it means for a learning environment to be universally designed**
- **Practical examples how specific learning environments (both on-ground and online) can accommodate to more learners**

*Aaron Baker is the Web Services Coordinator for the University of Arkansas where he leads a team of writers, designers, and developers focusing on user experience methodology in the design and development of web resources.*
