The Map and Orienteering Course

Installed at various locations around the Santa Fe Community College's property are 17 waypoints markers. Using maps and compasses, participants must find as many waypoints as they can in limited time. Each waypoint marker that the team locates is worth a fixed number of points. It will be up to the team to decide how to find as many markers and/or collect as many points as possible within the allotted time.

The Orienteering Course offers wonderful opportunities to address the following leadership and team objectives:

- To explore the importance of effective planning
- To experience and identify the challenges in dealing with change effectively
- To learn how to plan and lead in the face of uncertainty
- To reason through a decision-making process
- To work cooperatively with others to achieve a common goal
- To share individual ideas and experiences which contribute to the common good
- To build rapport and communicate effectively
- To adapt to changing leadership
